National Frameworks

Apprenticeship ILR / EDS

- T2G providers currently use the EDS code in Employer field A44 on the ILR
- Apprenticeship providers currently complete A44 as a free text field
- In 2008/9 London Region are requiring apprenticeship providers to use the EDS code also
- This additional requirement will only impact on stand alone Apprenticeship providers
- This will be mandatory for all Employer Responsive providers in 2009/10

Apprenticeship ILR / EDS

- Benefits:
- This will greatly reduce the need for specialist project codes to be recorded on the ILR e.g. the NHS Joint Investment Framework
- Will allow systematic analysis of employer participation
- Plan for Growth: Requirement in 2008/09 is to record Public Service employer participation
- Use of EDS codes will mean this can be recorded with minimum of inconvenience to providers

National Apprenticeship Service:

- NAS to have end to end responsibility for Apprenticeships
- LSC NAS Project Team, from September 2008
- NAS fully Operational from April 2009
- 16-18 Apprenticeship entitlement by 2013 - 15
- 1 in 5 of all 16-18 enrolled on an apprenticeship before the end of the academic year in 2019/20
- National target to increase Apprenticeships to 400,000 by 2020
- David Lammy, Chair of London Apprenticeship Taskforce
