Introduction

The area profile provides information about labour market and learning provision

Aim of the report

This report provides local intelligence to support the annual business planning process. It considers the learning and skills demand and supply, highlighting significant differences between national, regional and local areas.

Objectives

The report seeks to provide the following:

- Analysis of the local and regional social, economic, geographical and environmental conditions with particular attention to issues that will have an impact on policy making in the learning and skills sector;
- Analysis of the current state of learning for young people, including Year 11 destinations, post-16 participation patterns, young people's achievements and progression into higher education;
- Analysis of the current state of learning for adults, including analyses of levels of qualifications held in the workforce;
- Identification of current and likely future skills demand in the local labour market (based on the Working Futures II Survey); and
- Analysis of the quality, volumes, and curriculum mix of the provision offered by local providers.

Structure

This supplementary local data report provides additional information and tables that can be read alongside the regional data report.

The local data report uses the L prefix to distinguish between regional and local information.

The workbook is divided into worksheets corresponding to the sections of the main report.

Information sources

Data have been sourced from several providers and these are acknowledged accordingly. In particular, extensive use has been made of Crown Copyright materials, which are reproduced here under licence.

The main basis for the report is taken from the NOMIS area profiles which can be accessed at www.nomisweb.co.uk

Data on the education and training sector has been produced by the LSC Data Analysis teams.

Other information sources used in this report include:

- Higher Education Statistics Agency;
- Working Futures II;
- National Employer Satisfaction Survey;
- Connexions destinations survey; and
- Annual Business Inquiry.

Local indicators relating to population and society can also be examined using the Audit Commission area profiles website at www.area-profiles.audit-commission.gov.uk

The latest Office for National Statistics Region in Figures for the South East was published for 2004/05 at the end of 2005. It can be accessed at <http://www.statistics.gov.uk>

The South East England Development Agency has produced the third Regional Economic Strategy for the South East, 2006-2016. This provides the framework within which the Regional Development Agency works and defines the region's priorities and targets for the work of all the partners in its delivery. It can be accessed at <http://www.seeda.co.uk/res/>

The South East Regional Assembly provides a Regional Spatial Strategy for the South East to 2026. The current draft plan, which sets out a vision for the region from 2006-2026, focusing on housing, transport, economy and the environment, is available at <http://www.southeast-ra.gov.uk/southeastplan/index.html>. Similarly this plan is available through the Government Office for the South East at <http://www.gose.gov.uk/gose/planning/regionalPlanning/>, where information on the latest response to the plan can also be found.

The Government Office also has a role, on behalf of central government, in leading the discussions on Local Area Agreements. Further information on these can be found at <http://www.go-se.gov.uk/gose/localGovt/>. In addition to the Government Office, the South East England intelligence network also provides additional research and data that provide further context to this report and can be accessed at www.see-in.co.uk.

The Learning and Skills Council has also produced an annual progress report in 2006 which provides an analysis of the national and regional extent and nature of education, training and skills. This report can be accessed at www.lsc.gov.uk.

An LSC internal document providing performance review information is also available providing a summary of the contribution to key target areas and priorities alongside provider toolbox and planned delivery.

Known issues

This report is based on a range of information sources which include administrative, census and survey data.

Resident approaches are used in this report to provide a clearer link between supply and demand. However, resident based information is not always available. Where this is the case the terms workplace and provider may be used to identify that data relates to an entity located in the geographic area.

This report provides information for the region and for the local Learning and Skills below this where the data permits it. However a number of data sources are restricted in reporting for small areas due to disclosure (Annual Business Inquiry most not be disclosed below 50 units) or through confidence intervals (Annual Population Survey confidence intervals may be large)

Additional information regarding these issues is included as a note to the data sources in the supplementary data report.

Throughout this report information is rounded. The level of rounding varies on the information source and provider.

Geography

Berkshire comprises the six Unitary Authorities:

- Bracknell Forest;
- Reading;
- Slough;
- West Berkshire;
- Windsor and Maidenhead; and
- Wokingham.

Table 12b. Summary of the Index of Multiple Deprivation 2004
Berkshire Authorities

	Rank of Average Score	Rank of Average Rank	Rank of Extent	Rank of Local Concentration	Rank of Income Scale	Rank of Employment Scale	Number of SOAs	SOAs in the 20% most deprived in England - Overall Index		SOAs in the 20% most deprived in England - Education, Skills and Training	
								#	%	#	%
Bracknell Forest	319	318	290	306	281	290	74			3	4.1%
West Berkshire	329	329	298	335	245	270	97			3	3.1%
Reading	153	146	160	168	126	174	93	8	8.6%	24	25.8%
Slough	129	115	161	173	121	167	78	5	6.4%	8	10.3%
Windsor and Maidenhead	326	324	298	312	251	275	88				
Wokingham	352	352	298	344	307	298	100			1	1.0%

The six district level summary measures provide an insight into the distribution of deprivation

There is no best way of describing or comparing England's 354 districts

Average of SOA Scores is the population weighted average of the combined scores for the SOAs in a district.

Average of SOA Ranks is the population weighted average of the combined ranks for the SOAs in a district.

Extent is the proportion of a district's population living in the most deprived SOAs in the country.

Local Concentration is the population weighted average of the ranks of a district's most deprived SOAs that contain exactly 10% of the district's population.

Income Scale is the number of people who are Income deprived.

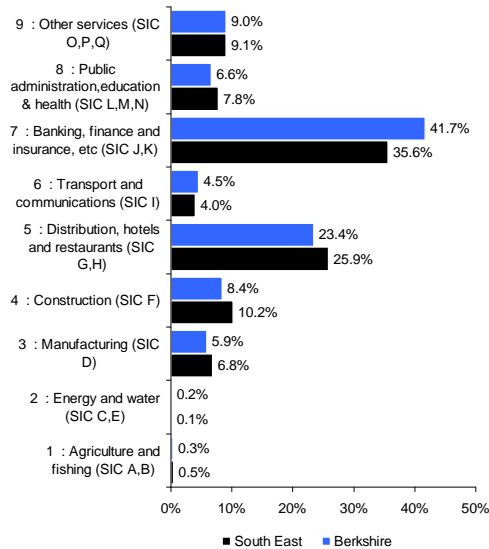

Employment Scale is the number of people who are Employment deprived.

Notes:

The populations come from PLASC data from DfES which counts how many learners there were in each cohort when they were aged 14. These are the population figures which DfES plan to use to measure progress against the PSA target

The number of learners reaching the level 2 threshold by age 19 have been calculated from the PLASC / SERAP / NISVQ / ILR matched dataset provided by Family Fischer Trust

These figures are based on the 2004/05 matched administrative data and update those sourced from 2003/04 the matched administrative data
