“Working, learning and earning suits many young people and the company they work for. It is a wonderful opportunity to develop their careers”.

Malcolm Gillespie
LSC Regional Director - South West

Apprenticeship Helpline: 08000 150 600
www.apprenticeships.org.uk

Earn while you learn

Get new skills. Get paid

Getting paid while you learn might sound too good to be true – but as an apprentice you really do get the best of both worlds.

As an apprentice you will learn on the job, acquiring hands on work-experience and nationally recognised qualifications related to your trade. You will be doing a real job and being paid a real wage or allowance whilst you learn.

Apprenticeships are available to young people aged between 16-24 who are leaving or have left full-time education. The entry requirements are dependent on each Apprenticeship and can vary across the learning providers.

For detailed information on entry requirements, please contact the relevant learning provider **(see contact details at the back of the guide).**

What's more, if you decide you want to increase your earning potential by furthering your career, you may be able to progress onto a related Foundation Degree or Degree course at the end of your Advanced Apprenticeship.

How to apply

Which way is best for you?

When choosing an area of work, remember to be flexible. For example if your first choice is engineering, think about related areas such as motor vehicle or building trades to improve your chances of getting a place.

Once you've decided which Apprenticeship is right for you, you'll need to get the ball rolling and start applying. There are a couple of ways to do this.

Route one: contact the learning providers

Using the matrix at the back of this guide, you'll find a list of learning providers and the Apprenticeships they offer. Learning providers vary and offer different types of training and levels of support. We recommend that you contact as many of the learning providers as possible and find out what they offer. When you contact the learning provider tell them that you are interested in an Apprenticeship, they will take your contact details and then they might do one of the following:

- send you an application form to fill in;
- invite you to an open day or interview;
- tell you straight away that they can't help you get onto the programme.

If a learning provider says they can't help, this could be for a number of reasons; it may be because all the places have been filled, or that you don't have the right level of qualification. If you don't have the qualifications, think about applying for the e2e programme to give you the start you need.

Some learning providers may already be in touch with employers who are looking for an apprentice like you. However, some may expect you to find employment for yourself.

Route two: find an employer

You can apply for an Apprenticeship by going direct to an employer. Keep your eyes open for Apprenticeship adverts in local newspapers and job listings. Large companies tend to advertise their Apprenticeship vacancies on their websites.

Or perhaps you already have a job, but want to get some qualifications under your belt too. Why not ask your current employer if they'll consider you for an Apprenticeship programme?

Applying for an Apprenticeship is like applying for any job – competition is stiff. Depending on the Apprenticeship you choose, you may be asked to attend one or more interviews, fill in forms and possibly take some tests.

Interview tips

The better prepared you are for an interview, the more confident you will feel. Ask your family or friends to interview you and practise answering questions like:

- What interests you about this job?
- What skills can you offer the company?
- What do you know about the industry?

Look on the company website before you go to the interview!

Don't forget to show an interest in the company/role and ask them some questions too.

If you have spoken to someone about Apprenticeships, but you still have some unanswered questions you can ring the Apprenticeship Helpline on 08000 150 600 and we will help you take the next step.

Take a closer look at Apprenticeships

How do they work?

The Apprenticeship programme offers you a great way to gain vocational training, qualifications and a wage all at the same time. The programme works through a three-way partnership between you, your employer and your learning provider.

Apprentice – A young person aged between 16-24 who is leaving or has left full-time education. You will be in a job and working towards your National Vocational Qualifications (NVQs) to gain your Apprenticeship.

Employer – The business or the person that you work for. You will spend most of your time here gaining industry knowledge and experience. Your employer will pay your wage, so generally you will need to find a company that needs an apprentice and is happy to employ you before you start the programme.

Learning Provider – The organisation that will train and assess you as you work towards your Apprenticeship qualification. You will either receive training in your workplace, at the training centre or at a local college. Your learning provider may be able to help you find a job, but not in every case. Whichever learning provider you choose, they will be in regular contact with you to ensure that things are running smoothly.

Levels

The Apprenticeship family consists of three different levels: Pre Apprenticeship (e2e), Apprenticeship and Advanced Apprenticeship. Each level has been designed to cater for different levels of ability and each enables you to progress onwards with your training.

Pre – Entry to Employment (pre – e2e) and Entry to Employment (e2e)

These are foundation or entry level courses for those who have the potential to join an Apprenticeship, but aren't quite ready for the full programme. Entry to Employment gives you the skills to enter the world of work and enables you to try out different jobs. You will also have the opportunity to work through issues that may have prevented you from progressing before.

Apprenticeship

A level 2 programme (equivalent to five GCSEs at grade A-C), which covers NVQs, Key Skills and possibly Technical Certificates.

Advanced Apprenticeship

A level 3 qualification (equivalent to two A Levels) covering NVQs, Key Skills and possibly Technical Certificates.

Young Apprenticeships

A limited number of Young Apprenticeships have been running across the South West of England since 2004.

The Young Apprenticeship programme offers practical based learning to Year 10 students. They gain vocational skills through extended work placements, whilst underpinning their knowledge with practical based lessons and continued studies towards core GCSE qualifications such as English, Maths, Science and ICT at either school or college.

The programme has input from local employers, schools and training providers as well as Connexions. For more details on whether **Young Apprenticeships** are offered in your local area, contact your local Connexions Service on the telephone number provided at the back of this guide or speak to your school advisor.

What qualifications will I get?

Each programme enables you to gain knowledge and valuable learning experiences within your chosen industry – providing a practical route to gaining qualifications and employment.

Whichever Apprenticeship you choose, you will work towards gaining a NVQ qualification, Key Skills and possibly Technical Certificates.

National Vocational Qualifications (NVQs)

These practical training qualifications are awarded to you based on your competency in the work place and your industry skills/knowledge. They are achieved through a series of continual assessments (no final exams) that are monitored by your learning provider.

There are five levels of NVQ, ranging from level 1 covering basic work competencies to level 5 for senior managers.

Key Skills

You will probably have heard of Key Skills at school. Each Key Skill focuses on developing essential knowledge that we all need in order to do well in the work place and in life.

Key Skills include:

- Communication
- Application of number
- Information technology
- Working with others
- Improving own learning
- Problem solving

Technical Certificates

Some Apprenticeship programmes also enable you to work towards Technical Certificates. These certificates prove that you fully understand the theory behind the job as well as being able to carry out the practical tasks. For more information on Technical Certificates forming part of your Apprenticeship, please ask the learning provider before you enrol.

Apprenticeships

A nice little earner

Not only are Apprenticeships a great way to get your career off to a flying start by learning on the job, you will also gain a whole host of additional benefits.

The Apprenticeship programme enables you to access your company's benefits, like holiday and sick pay, and support from your learning provider.

How much will I get paid?

Like any job, the wage or training allowance that you will receive will depend on your skills and experience. If you are employed by the company, most employers pay between £80-£150 per week. If you are already employed by the company and join the Apprenticeship programme, you will earn a salary that is agreed between you and your employer. Most apprentices (95%) are employed and get the going-rate for the job as a trainee. If you are placed with a company but not employed by them, you will be able to apply for Education Maintenance Allowance (EMA). Full guidance is available at www.dfes.gov.uk/financialhelp/ema

Holidays

As an apprentice you will be entitled to at least 20 days paid holiday per year (including bank holidays). Your entitlement will be outlined in your terms of employment and training agreement.

Sick leave

Unfortunately, we all fall ill from time to time. If problems arise or you do fall ill, ensure that everyone who needs to know is informed of where you are and what is wrong.

Careers advice

Career advice and guidance is completely FREE to those between the ages of 13 and 19. For details please contact Connexions Direct on 080 800 13 2 19 or visit their website at www.connexions-direct.com

Extra help

If you need books, clothing or equipment which are essential to your job, or if you need help to adapt your training environment to cope with a disability – please discuss this with your learning provider or Connexions Personal Adviser. You may also be entitled to help with travelling costs if you are in a placement.

Some childcare costs may also be paid.

What's available locally?

The following page gives you an idea of the type of Apprenticeships available in your area.

Apprenticeships available

Bournemouth, Dorset & Poole/Somerset

Accountancy and Finance

Due to a large number of financial organisations across the South West, there is a high demand for skilled employees in this area.

Agriculture and Land-Based

Working with plants or animals can be a highly rewarding career where no two days are the same.

Animal Care (including Horse Studies)

Work with domestic pets, or specialise in zoo animals or horses.

Building Trades

Construction is a growing industry that needs well trained and experienced people to fill the skills gap.

Business Services

Vital across all industries; your role will keep businesses working efficiently and effectively.

Electrical Installation

A highly skilled profession which includes installation and correcting electrical faults. A skills shortage means these apprenticeships are in high demand.

Engineering/Manufacturing

A large and varied industry where jobs can range from making tools to fitting aeroplanes.

Hairdressing and Beauty

A vibrant industry for creative and passionate people.

Health and Care

A diverse range of professions which can lead to highly rewarding careers.

Hospitality and Catering

An industry for those passionate about food, drink and looking after their guests.

Information Technology (includes Design & Print)

A technical and creative industry which spans network maintenance to computer aided design.

Motor Vehicle

New techniques and technology make this an exciting and developing industry.

Retail

With a wide range of shops across the South West, there is constant demand for well trained and enthusiastic staff.

Sport and Recreation

From gyms and sport centres to tourist attractions and theme parks, no two days will be the same.

Warehousing and Distribution

Organisation is key. Storing goods and ensuring that they get from one place to the next on time.

Other Options

Apprenticeships are just one way to get your career off to a great start

Starting an Apprenticeship is just one of the options available to you after Year 11. You may decide that getting a job, staying on at sixth form or going on to college is right for you – you just need to find out which option best suits your needs and learning style.

Sixth form

Your tutor or careers teacher will be able to tell you about the options available in your school's sixth form and the grades you will need to get a place on the course. If your school doesn't have a sixth form you can apply to join a sixth form at another school nearby or go to college.

Colleges

Colleges offer a wide choice of courses and qualifications. It is best to do some research into each one to find out what courses/qualifications they offer, the pass rates for your chosen subject(s), what the facilities are like and the type of support they can offer you. Have a look at their prospectus, visit their website, go to the open days, and talk to staff and students to get a feel for the courses and the college.

Paid time off for study

If you are employed, aged 16 or 17 and left school without getting at least five GCSEs grade A-C, you are entitled to paid time-off for study or training from your employer.

If you are employed, aged 18 and left school without getting at least five GCSEs grades A-C, you are entitled to paid time-off from your employer to finish any study or training that you have already started.
