Subject: *"Information Management Portal Introduction – New Users"*

The YPLA has developed an Information Management Portal, to provide a secure and efficient means of sharing confidential and sensitive information which is specific to your organisation.

Over time, we will develop this facility to provide a comprehensive and easily accessible range of data and information available through a single source. As time progresses we propose that this will allow the two-way exchange of information through a single route.

This portal will replace the Provider Gateway which you may have used in the past. This transition will happen over time and will increasingly become the single source for secure and sensitive information for YPLA funded organisations.

For new users who do not currently have a Provider Gateway login you will shortly receive an email entitled '**Welcome to the Provider Gateway**'. The purpose of the email will be to add you as a new user to YPLA systems. The email will be automatically generated and will require you to follow a process of clicking a link and then adding in a password. Once you complete this process your account will be activated and it will enable you to access the YPLA Information Management Portal.

Once this is completed to access the YPLA Information Management Portal follow this link:

<https://gateway.imservices.org.uk>

Please note: for further information contact your YPLA regional representative on 0845 337 2000. Please **do not** respond to this email address.
